Solutions for Precision Healthcare™

Integrated Risk Management Example:
Episodes of Care in the IDS

- **The Health Sciences Universe™ product combines three solutions:**
  - An set of social, care, case and disease management software products operating as an integrated enterprise-wide solution for total risk management using the Internet and a central repository to create and monitor multiple healthcare and disability management programs with central supervision by a enterprise implementing value-based precision healthcare solutions
  - A systems integration "platform" architecture for building and integrating real-time Internet "Cloud" applications in insurance and healthcare supporting:
    - Family-Centered Care/Worker's Compensation/Disability/Transitional
    - Healthcare and Telehealth
    - Behavioral Healthcare/Social Services
    - Virtual Medical Center Architecture integrated w/o (re-)insurance
    - Medical Home, Hospital at Home, Early Discharge, Device Management
    - A Solution for an Enterprise to ensure that standards of finance and care are continuously applied by the use of real-time patient-centered rules
  - An analytical system for cost and quality of care measurement and prediction
